

DELIVERY SYSTEM FOR A STENTLESS VALVE BIOPROSTHESIS

ABSTRACT OF THE DISCLOSURE

The current invention discloses a catheter and a method for delivering a stentless
bioprosthesis in a body channel, the method comprising percutaneously introducing a catheter
5 into the body channel, wherein the catheter contains said stentless bioprosthesis at a retracted
state; and disengaging said stentless bioprosthesis out of a distal opening of the catheter by a
pulling mechanism associated with the catheter structure.
